DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the dispenser using the top, bottom or side edge for dispensing must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8,21-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Testi USPN 2,288,979.

Testi discloses a dispenser comprising a main body and a textured dispensing cylinder, said cylinder being mounted in a channel to allow movement of the cylinder vertical movement relative to the plane of a stack of articles. Testi discloses dispensing strips of metal which can be tested and held at one or more positions. The dispensing device presses against a side of the article being dispensed, said side can be considered a top, bottom, or side depending on how it is defined.

Claims 1-5,12-17 and 19-24 rejected under 35 U.S.C. 102(b) as being anticipated by Alltop et al. USPN 3,308,989.

Alltop discloses a dispenser comprising a main body and a thumb actuated pressed dispensing element. The dispensing element includes slots and protrusions for guiding the element and stopping its movement at first and second positions and a protrusion for contacting the strip. The dispensing device presses against a side of the article being dispensed, said side can be considered a top, bottom, or side depending on how it is defined.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Testi in view of Wajda PGpub 2003/0121932.

Testi discloses the dispenser as claimed in claims 1-8.

Testi does not disclose a ball shaped dispenser.

Wajda teaches a ball shaped dispenser wheel.

It would be obvious to one skilled in the art to modify the dispenser of Testi to use a ball instead of a cylinder as it is an art recognized alternative.

Allowable Subject Matter

Claim 18 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USPNs 6,082,581, 933,663, 6,155,456, 1,734,644 and 7,138,089.
